Frontend Engineer with hands-on experience building production-scale applications in a collaborative startup environment. Focuses on design systems, component architecture, and translating complex UX requirements into accessible, performant interfaces.

EXPERIENCE

Frontend Engineer Intern

Oct 2025 - Present

Confidential | Miami, FL

- Built production-facing UI features and frontend improvements, contributing 40+ merged pull requests while collaborating closely with engineering, product, and QA teams.
- Led consolidation and redesign of the company's design system across Figma and the frontend application, aligning design tokens, theming, and reusable component patterns with evolving brand standards.
- Expanded and refined a large-scale component library using React, TypeScript, Tailwind CSS, Storybook, and HeroUI, improving UI consistency and frontend development workflows across the platform.
- Designed and implemented a multi-step onboarding flow integrated with backend APIs, balancing UX decisions with technical constraints across the full user journey.
- Created structured design system documentation, component usage standards, and accessibility guidelines to support scalable UI development workflows and AI-assisted component generation.

Freelance Frontend Developer

Nov 2023 - Nov 2024

Symptoms of Nature: A Creative Collective | Miami, FL | symptomsofnature.com

- Sole developer across all design, architecture, and deployment decisions for a React site with a serverless content pipeline using Netlify Functions and the Notion API, enabling non-technical collaborators to publish content without a CMS.

PROJECTS

HRS: Web-Based Audio Manipulation Tool | hrs-app.netlify.app

- Built a browser-based audio manipulation tool to explore real-time pitch and speed control using the Web Audio API.
- Implemented responsive UI controls and client-side audio processing workflows, deploying via Netlify.

envi: A Creative Portfolio | envimusic.netlify.app

- Designed and developed a multimedia React portfolio featuring a custom audio player with synchronized artwork and playback controls, optimizing large audio file delivery using Cloudinary CDN to improve playback performance and reduce latency.

SKILLS

Technologies: TypeScript, JavaScript (ES6+), React, Next.js, HTML5, CSS3, Tailwind CSS

UI Engineering: Storybook, Design Systems, Component Libraries, Responsive Design, WCAG, Figma

Tools & Platforms: Git, GitHub, Netlify, Cloudflare, Jira, Confluence, Contentful, Cloudinary, WordPress

Additional: REST APIs, basic Node.js/Express, Agile Development, API Integration

EDUCATION

Front-End Engineering | **Codecademy** | Oct 2022 - Dec 2023

Bachelor of Science, Marketing | **Florida State University** | Aug 2016 - May 2020
